

E-Park Mini Guide

Introduction

Springwood Conservation Park is a patch of open Eucalypt forest facing west on a ridge in Logan City. It is home to many native species of flora and fauna as well as some sandstone boulders and an old chossy quarry. The problems range from approximately two to four meters in height.

Access

From Brisbane CBD take the South East Freeway (highway 1) southbound for 15km. Take the Springwood Road exit and turn left into Springwood Road. Continue along Springwood Road for approximately 3km and turn right into Plateau Dr at the second roundabout. Park just after the bend in the road and the entrance is on your right.

Walk through the park gate and take the Discovery Track left for approximately 100m. Walk past the "Fauna Friendly Gardens" sign. The top of the main bouldering area should be visible on your right about 5m from the Discovery Track. If you reach the footbridge you have gone too far.
